

Shams Mohammed Saiham Kabir

Darmstadt, Germany — shams-msk.com — shamsmohammed726@gmail.com

Open to: Junior Developer Positions (Entry-Level – AI, Full-Stack, SAP, Salesforce & Software Development)

Experience

-
- PASS Consulting Group | Java, TypeScript, Python, SQL, XML, REST-API** **Sep. 2025 – July 2026**
Intern, Working Student & Bachelor's Thesis Student in Research and Development
- Designed and implemented a user-friendly BPMN diagram visualization that significantly improved usability for end users by reducing complexity.
 - Developed new features and fixed bugs in an existing TypeScript/Java application as part of an agile development team.
 - Conducted my Bachelor's thesis on anomaly detection in IT system log data using machine learning algorithms.
- Abasoft EDV-Programme GmbH | JavaScript, PHP, SQL, HTML, CSS, REST-API** **Sep. 2024 – Jul. 2025**
Working Student in Software Development
- Implemented new features such as a virtual keyboard, waiting room views, as well as various CSS enhancements and bug fixes using PHP, HTML, CSS, and JavaScript.
 - Extended existing functionality in close collaboration with the development team using React.
- Darmstadt University of Applied Sciences | Python, REST-API** **Apr. 2024 – Aug. 2025**
Student Research Assistant
- Developed interactive mock dashboards using Python and frameworks such as Streamlit and Voila to visualize research data.
 - Containerized the Python dashboard application using Docker.

Projects

-
- MCP RAG Sports & Weather Assistant | Python, LangChain, Gemini, MCP, RAG** **[GitHub Link]**
- Developed a proof-of-concept (PoC) terminal-based AI assistant combining weather data and sports knowledge to provide outdoor activity recommendations.
 - Integrated MCP tools, RAG, and conversational context, with planned extensions into a WhatsApp and web-based assistant.
- SerpentBot | React, BFS Algorithm, Manhattan Heuristic** **[GitHub Link]**
- Developed an interactive Snake simulation in React with manual and autonomous game modes, using a BFS-based pathfinding algorithm with a Manhattan heuristic for food search and collision avoidance.
- Outlook Plugin | React, Hugging Face** **[GitHub Link]**
- Developed an Outlook plugin that reads email content and automatically generates summaries using Hugging Face models.
- ShopEsy | React, Express, Jest, Supertest** **[GitHub Link]**
- Developed a CRUD application for managing shopping items with complete Create, Read, Update, and Delete functionality.
 - Implemented automated API tests using Jest and Supertest to ensure reliability.
- Skyrim Website | React, MongoDB, Express, Supertest** **[GitHub Link]**
- Developed an interactive map application for Skyrim with a navigation service as part of a team, applying DevOps principles.
 - Conducted API testing with Supertest to ensure backend stability.

Education

-
- Darmstadt University of Applied Sciences** **Oct. 2022 – Jul. 2026**
Bachelor of Science in Computer Science
- Relevant Coursework: DevOps with Kubernetes, Systems Development Project, Software Engineering, Advanced Web Development, Artificial Intelligence, Databases, Algorithms and Data Structures.

Technical Skills

Programming Languages: Java, JavaScript, TypeScript, Python, PHP

Frameworks & Libraries: React, Express, PyTorch, Streamlit, Scikit-learn

Development Tools: Git, Docker, Kubernetes, IntelliJ, VS Code, Postman

Databases: SQL, MongoDB

Methods: Scrum, REST APIs, CI/CD

Languages

German: C1 (Professional Working Proficiency)

English: C2 (Native-level Proficiency)
